

REMARKS

Claims 1-4 are pending and have been rejected. Claims 1-4 have been amended to recite a more particular embodiment of the invention. Support for the amendment appears in paragraph 0026 of the disclosure. No new matter has been added. Accordingly, claims 1-4 are submitted for further consideration in view of the following remarks.

Claims 1-4 stand rejected under 35 USC 102(e) as anticipated by Hendricks et al. '386. The PTO is heard to state that the cited reference identically discloses every limitation of the claims. However, the '386 patent does not appear to disclose continuous changes of camera angle, or systems or methods for viewing or recording events that include continuous changes of camera angle using a processor to generate smooth transitional views between two cameras, as presently claimed. Thus, the cited reference does not appear to disclose every limitation of the present claims, and therefore does not anticipate the claims. Withdrawal of the rejection on this basis is respectfully urged.

In view of the amendments to the claims and the foregoing remarks, it is submitted that all present claims are in condition for allowance. Should the Examiner have any questions, he is invited to contact the undersigned at the telephone number indicated.

Respectfully submitted,

  
Michael M. Gerardi
